

SIMPLY BUILT TO LAST. GUARANTEED.*

FINALLY – A
COMPANY THAT
**LOVES BIKES AS
MUCH AS YOU DO.**

Chances are, your bikes are just like ours - your most valued possessions. And if it has the Saris name on it, nothing we build goes out the door unless it's worth putting those possessions on. Call it obsessive. Call it eccentric. We just chalk it up to caring a hell of a lot about creating the last rack you'll ever need.

1. Using holes in unit (parking rack, picnic table, etc.) as a guide, mark mounting hole locations. **Note:** *It may be necessary to drill holes in base of unit being secured.*
2. Dig a 3-1/2" diameter starter hole approximately 3" below grade at each located mark.
3. With a bar or pipe inserted into anchor eye, screw anchor into soil until bottom of eye is flush with ground (Fig.1)
4. Hook J-bolt through anchor eye. Insert end of bolt up through hole in rack, table, etc. and secure with a 5/16" flat washer, split lock washer, and 5/16"-18 hex nut (Fig. 2). Cut off any excess bolt and peen with a hammer to deter removal.

Earth Anchor Kit
